

Exercise

Help Your Child to Stay Healthy

1. Help your child to find an exercise activity he/she likes to do:
 - ◆ Playing ball
 - ◆ Gardening
 - ◆ Going to the park
 - ◆ Dancing
 - ◆ Fishing
 - ◆ House Cleaning
2. Encourage your child to do the activity at least 3 times a week or more for about half an hour each time
3. Most kids don't need an exercise program- but it is very important to keep them active
4. Remember to check with your doctor before starting any new type of activity program that could be strenuous
